

<i>Preface</i>	<i>xiii</i>
<i>Acknowledgments</i>	<i>xvii</i>
<i>About the Editors</i>	<i>xix</i>
<i>List of Contributors</i>	<i>xxi</i>
<i>List of Figures</i>	<i>xxiii</i>
<i>List of Tables</i>	<i>xxxi</i>

1. An Introduction to Network Coding	1
Frank R. Kschischang	
1. The Butterfly Networks	2
2. Graphs and Networks	6
2.1. Combinational Packet Networks	6
2.2. Network Information Flow Problems	8
3. The Single-Source Multicast Problem	9
3.1. Multicast Capacity	9
3.2. Linear Network Coding	10
3.3. Linear Network Coding Achieves Multicast Capacity	13
4. Construction of Network Codes for Multicasting	16
4.1. The Linear Information Flow Algorithm	16
4.2. Random Construction	20
5. Coding versus Routing	21
6. Noncoherent Network Coding	24
6.1. Transmission with Packet Headers	24
6.2. Subspace Transmission	25
7. On Alphabets and Nonlinearity	26
8. Conclusions	29
Acknowledgments	29
Appendix	29
A. Finite Fields	29
B. Zeros and Nonzeros of Polynomials	32
c. The Degree of $\det(\mathbf{G},)$	35
References	36

2. Harnessing Network Coding in Wireless Systems	39
Dina Katabi, Sachin Katti, and Hariharan Rahul	
1. Introduction	40
2. Network Coding Background: The Practitioner's Perspective	41
3. Applications of Network Coding in Wireless Networks	44
3.1. COPE: Network Coding for Increased Throughput	44
3.1.1. <i>The Protocol</i>	45
3.1.2. <i>Performance Results</i>	48
3.2. MORE: Network Coding for Increased Reliability	49
3.2.1. <i>Example 1: Dead Spots</i>	50
3.2.2. <i>Example 2: Multicast</i>	52
3.2.3. <i>The Protocol</i>	52
3.2.4. <i>Empirical Results</i>	53
3.3. Analog Network Coding: Embracing Wireless Inference	54
3.3.1. <i>The ANC Decoder</i>	58
4. Conclusion	59
References	59
3. Network Coding for Content Distribution and Multimedia Streaming in Peer-to-Peer Networks	61
Chen Feng and Baochun Li	
1. P2P Content Distribution with Network Coding	62
1.1. How can Network Coding be Applied to P2P Content Distribution?	62
1.2. Why is Network Coding Helpful in P2P Content Distribution?	64
1.3. Theoretical Results on P2P Content Distribution with Network Coding	65
1.4. Practical Aspects of P2P Content Distribution with Network Coding	70
2. P2P Multimedia Streaming with Network Coding	71
2.1. How can Network Coding be Applied to P2P Multimedia Streaming?	72
2.1.1. <i>Random Push on a Random Mesh Structure</i>	74
2.1.2. <i>Timely Feedback from Downstream Peers</i>	75
2.1.3. <i>Synchronized Playback and Initial Buffering Delays</i>	76
2.2. Why is Network Coding Helpful in Multimedia Streaming?	77
2.3. Theoretical Results on P2P Multimedia Streaming with Network Coding	78
2.4. Practical Aspects of P2P Multimedia Streaming with Network Coding	82
3. Conclusion	84
References	84

4. Network Coding in the Real World	87
Janus Heide, Morten V. Pedersen, Frank H.P. Fitzek, and Torben Larsen	
1. Introduction: It's not Rocket Science	87
2. Network Coding for Mobile Phones	88
3. System Components and Design Choices	93
4. Practical Problems	97
5. A Binary Deterministic Approach	99
6. Random Linear Network Coding (RLNC)	100
7. Speeding up RLNC through Optimizations	102
8. Speeding up RLNC through Design	105
9. A Mobile Phone Application with Network Coding	107
10. Pitfalls and Parameters	110
References	113
5. Network Coding and User Cooperation for Streaming and Download Services in LTE Networks	115
Qi Zhang, Janus Heide, Morten V. Pedersen, Frank H.P. Fitzek, Jorma Lilleberg, and Kari Rikkinen	
1. Introduction	116
2. Raptor Code in eMBMS	120
3. Packet Erasure Pattern	124
4. User Cooperation for Erasure Recovery	126
5. Network Coding Applied in User Cooperation	131
6. Simulation Results	135
7. Conclusion	138
References	139
6. CONCERTO: Experiences with a Real-World MANET System Based on Network Coding	141
Victor Firoiu, Greg Lauer, Brian DeCleene, and Soumendra Nanda	
1. Introduction	143
1.1. Challenges in Wireless MANETs	143
1.2. The CONCERTO Approach	145
2. CONCERTO Overview	146
3. Network Coding	148
3.1. CONCERTO Network Coding	149

4. Subgraph Construction	151
4.1. Algorithm	151
4.2. Implementation	152
5. Network Coding Transport Protocols	154
5.1. Reliable Transport in MANETs	154
5.2. Forwarding Protocol Architecture	155
5.3. The Master/Slave Architecture of the Net Coding Transport Protocols	157
5.4. The Semi-Reliable Slave Forwarder Algorithm	158
5.5. The Fully-Reliable Slave Forwarder Algorithm	159
6. Network Coding Benefits	160
6.1. Unified Broadcast, Multicast, and Unicast	160
6.2. Robustness to Routing Loops	160
6.3. Robust to Link and Node Failures	162
6.4. Provides Low-Latency Link Layer Coding	162
6.5. Extremely Opportunistic Routing (ExOR)	163
6.5.1. Long Hops	164
6.5.2. Lots of Lossy Links	164
7. Field Experiment Infrastructure	165
7.1. Hardware	166
7.2. Baseline System	166
7.3. Scenario Traffic	168
7.4. Evaluation Methodology	168
8. Experimental Results and Analysis	169
8.1. Experiment Scenarios	169
8.2. Experimental Results	173
8.2.1. Ground Tactical Scenario	173
8.2.2. Air Tactical Scenario Results	178
8.2.3. Tactical Scenario File Transfer Results	179
9. Conclusion and Future Work	180
9.1. Summary	180
9.2. Future Work	181
Acknowledgments	181
References	182
7. Secure Network Coding: Bounds and Algorithms for Secret and Reliable Communications	183
Sidharth Jaggi and Michael Langberg	
1. Introduction	184
1.1. Overview of Chapter	185

2. Model	186
2.1. Threat Model	186
2.2. Network and Code Model	186
3. Eavesdropping Security	188
3.1. The Coherent Case	188
3.2. The Non-Coherent Case	192
4. Jamming Security	194
4.1. The Coherent Case	194
4.2. The Non-Coherent Case	197
4.3. The Cryptographic Setting	202
5. Secret Transmission in Presence of Eavesdropping and Jamming Adversaries	206
5.1. The Coherent Case	206
5.2. The Non-Coherent Case	207
6. Some other Variants	209
7. Discussion	210
Acknowledgments	210
References	210
8. Network Coding and Data Compression	217
Mayank Bakshi, Michelle Effros, Tracey Ho, and Muriel Medard	
1. Introduction	218
2. Model and Notation	221
3. Rate Region Properties for General Joint Source–Network Coding	223
4. Capacity Results for Lossless Multicast	225
4.1. No Side Information Scenario	225
4.2. Side Information at Sinks	226
5. Practical Approaches	227
Appendix	228
References	233
9. Scaling Laws with Network Coding	235
Atila Eryilmaz and Lei Ying	
1. Introduction and Basic Setup	236
2. Wireless Broadcast over Lossy Links	237
2.1. Delay Scaling Gains	237
2.2. Extensions	242
2.2.7. <i>Topological Extensions</i>	242

2.2.2. Arrival Dynamics	244
2.2.3. Accounting for Delay Sensitivities of Incoming Traffic	246
2.3. Throughput and Delay Trade-off	248
3. Coding in Large-Scale Mobile <i>ad hoc</i> Networks	253
3.1. An Example: Delay-Throughput Trade-off under an i.i.d. Mobility Model	254
3.2. Extension to Multicast Traffic Flows	259
3.3. Summary of Existing Results	261
4. Conclusion	263
References	264
10. Network Coding in Disruption Tolerant Networks	267
Xiaolan Zhang, Giovanni Neglia, and Jim Kurose	
1. Introduction	268
2. Background on Disruption Tolerant Networks and Random Linear Coding	270
2.1. Network Model	271
2.2. DTN Routing Schemes Overview	272
2.2.1. DTN Broadcast Routing Schemes	272
2.2.2. DTN Unicast Routing Schemes	273
2.3. Random Linear Coding	274
3. Design Space	276
4. Coding Benefits for Broadcast Communication	279
4.1. Coding Benefits in Energy Efficiency	280
4.2. Practical RLC Broadcast Scheme	281
5. Coding Benefits for Unicast Applications	283
5.1. Network Coding Reduces Block Delivery Delay	284
5.1.1. Minimum Block Delivery Delay	284
5.1.2. Probability to Achieve Minimum Block Delivery Delay	287
5.1.3. Other Metrics	290
5.2. Network Coding Improves Delay vs. Transmission Number Trade-off	291
5.3. Discussion about RLC Benefits	294
5.3.1. Impact of Different Bandwidth and Buffer Constraints	294
5.3.2. Impact of Generation Management	296
5.3.3. Impact of Control Signaling	296
5.4. Modeling Studies of Network Coding Scheme	298
5.5. Other Works on an RLC Scheme in Unicast Application	301
5.5.1. Priority Coding Protocol	301

5.5.2. <i>Optimal Control of a Two-Hop Scheme</i>	302
5.5.3. <i>Network Coding Based Secure Communication for DTN</i>	302
6. Open Issues	303
6.1. RLC Benefits for Application with Short Messages	303
6.2. An RLC Scheme for Multicast Communication	304
7. Summary and Conclusions	305
References	305
Index	309
